DETAILED ACTION

This communications is responsive to amendment filed on September 20, 2004.

Applicant adds new claims 10-12.

Response to Arguments

1. Applicant's arguments, see pages 16-18, filed on September 20, 2004, with respect to claims 1-9 have been fully considered and are persuasive. The rejection of claims 1-9 has been withdrawn.

Allowable Subject Matter

2. Claims 1-12 are allowed.

2. The following is an Examiner's Statement of Reasons for Allowance: Claims 1-12 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches a color conversion method or apparatus for converting printing image data which comprises process color image data defined by a coordinate value of a predetermined first color space, and spot color image data defined by a coordinate value of a characteristic direction, into image data defined by a coordinate value of a predetermined second color space, for a proofer for outputting a proof image in which an image obtained through printing of an image based on the printing image data in accordance with a predetermined printing condition is reproduced,

Art Unit: 2626

comprising the steps of or means for synthesizing, on the colorimetry color space or the second color space, image data defined by coordinate values of the colorimetry color space or the second color space, wherein the process color image data is converted with image data defined by coordinate values of the colorimetry color space or the second color space, and wherein the spot color name is converted; and the printing image data, which comprises the process color image data defined by the coordinate value of the first color space, and the spot color image data defined by the coordinate value of the characteristic direction, is converted into the image data defined by the coordinate value of the second color space, for the proofer.

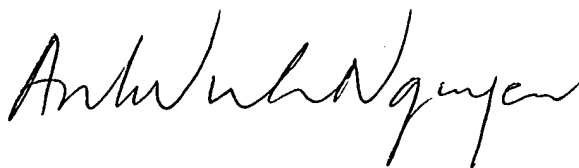

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - a. Gill et al (US Patent No. 6,633,666) discloses a process and system for defining and visually depicting a combination of process colors and spot colors.
 - b. Jodra et al (US Patent No. 6,607,258) teaches a proofing data file generated by target printer facility.
